

ENTERPRISE RISK MANAGEMENT

Overview

Managing risk is iterative and assists organizations in setting strategy, achieving objectives and making informed decisions. It is a part of governance and leadership, and is fundamental to how the organization is managed at all levels. It contributes to the improvement of management systems. Managing risk is part of all activities associated with an organization and includes interaction with stakeholders. Managing risk considers the external and internal context of the organization, including human behaviour and cultural factors. Managing risk is based on the principles, framework and process outlined as illustrated in figure below. These components might already exist in full or in part within the organization, however, they might need to be adapted or improved so that managing risk is efficient, effective and consistent.
